Professional Summary

Self-driven Full Stack Developer with a strong foundation in modern web technologies and a passion for solving real-world problems through software. Experienced in building responsive applications using React, Next.js, TypeScript, and PostgreSQL. Actively contributing to open-source projects on GitHub and developing SaaS platforms with AI integration. Known for clean code, collaborative mindset, and rapid learning in dynamic environments.

Technical Skills

Frontend: React, Next.js, TypeScript, JavaScript, HTML, CSS, Tailwind, Shadcn UI

Backend: Node.js, Express, PostgreSQL, SQL, REST APIs

C# / .NET: ASP.NET MVC, Windows Forms, XAML, OOP, Design Patterns, Collections, Generics

AI & Dev Tools: GitHub Copilot, Cursor, ChatGPT, Base44

Platforms & Tools: Git, GitHub, VS Code, Azure, Stripe Integration, Agile, Unit Testing, UX/UI Principles

Languages: English (fluent), Portuguese (fluent

Projects & Development Experience

Barbershop Booking System

Tech Stack: Next.js, React, TypeScript, PostgreSQL, Shadcn UI, Email Auth

- Built a full-featured booking platform with user dashboards and appointment scheduling

- Designed responsive UI for mobile and desktop

- Implemented secure email authentication and relational database structure

McDonald's Checkout System Clone

Tech Stack: Next.js, React, TypeScript, PostgreSQL, Stripe API

- Developed a functional replica of a fast-food ordering system

- Integrated Stripe for secure payments and email-based user authentication

- Focused on real-world checkout flow and responsive design

Currency Converter App

Tech Stack: Next.js, React, API Integration

- Created a live currency conversion tool with real-time exchange rates

- Delivered interactive UI and seamless API integration

Gastro Grid – SaaS Kitchen Management System (In Progress)

Tech Stack: Next.js, React, TypeScript, PostgreSQL, AI Tools

- Building a scalable SaaS platform for recipe, cost, and inventory management

- Integrating AI-powered features for menu planning and event prep

- Designed for both individual chefs and enterprise catering teams

Open-Source Contributions

- Actively contributing to GitHub repositories focused on React tooling, TypeScript utilities, and UI component libraries

- Submitted pull requests, opened issues, and participated in community discussions

- Collaborating with maintainers to improve documentation and code quality

Education

Toi Ohomai – Te Pūkenga

Level 6 – Software Development (2023–2024)

- RESTful APIs, microservices, UX/UI, testing, enterprise solutions

- Capstone: Built a scalable team-based software solution using Agile and clean code principles

- Strong emphasis on C#/.NET: OOP, Design Patterns, Algorithms, Windows Forms, ASP.NET MVC, XAML

Level 5 – Web Design & Development (2022)

- Frontend: HTML, CSS, JavaScript Backend: SQL, PostgreSQL, Node-JS

- Capstone: Delivered a complete web solution with strong UX/UI and project management
